

BLACK+DECKER BCED37 Compact Dryer for Small Spaces

QUICK BUYER GUIDE

Ideal for small apartments or spaces with limited room for full-size dryers

At a Glance Specs

CAPACITY

Dries 13.2 lbs of laundry per load

DIMENSIONS

23.6" x 21.5" x 27.5" footprint

VOLTAGE

Runs on standard 120V outlet

WEIGHT

49.5 lbs with adjustable legs

VENT HOSE

4" diameter exhaust connector

MODES

4 drying options including sensor dry

Who It Is For

-  Landlords needing portable drying solutions
-  Tiny home dwellers with limited space
-  Campers requiring compact drying
-  Apartment residents without vent access
-  Users needing energy-efficient drying
-  Those prioritizing portability over capacity

Who It Is Not For

-  Users requiring 220V dryer performance
-  Large households with high laundry volume
-  Those needing permanent vent installation
-  Commercial laundry operations
-  Users prioritizing ultra-fast drying
-  Spaces with limited electrical outlets

Trade Offs to Consider

-  Longer drying times than full-size units
-  Lower power output compared to 220V models
-  Requires careful leveling for stability
-  Smaller capacity per load
-  Limited vent hose compatibility
-  Higher energy use per pound dried

How It Compares

- Smaller footprint than full-size units
- Lower power consumption than commercial dryers
- Easier to move than wall-mounted systems
- Less capacity than traditional dryers
- No permanent installation required
- Higher energy use per load

Choose This If...

- ✓ Need portable drying solution
- ✓ Prioritize space efficiency
- ✓ Want energy-efficient drying
- ✓ Require no permanent installation
- ✓ Need compact storage options
- ✓ Value portability over capacity

Skip This If...

- × Require high-capacity drying
- × Need 220V dryer performance
- × Have limited electrical outlets
- × Prioritize ultra-fast drying
- × Need permanent vent installation
- × Have large laundry volume
